

# BoardSecure

**CLIENT BUSINESS**  
Governance software provider  
**SOFTWARE APPLICATION**  
Training & certification platform

/// Digital Projects UK rapidly and efficiently delivered an impactful, high-quality training and certification platform.

## ABOUT THE CLIENT

**BoardSecure** is a governance management platform for companies and charities. By digitalising processes around officer onboarding, personal development, board meetings and regulatory risk, BoardSecure’s secure, coordinated solution promotes compliance, transparency and administrative excellence.

## BACKGROUND TO THE PROJECT

With its core platform already in place and attracting users, **BoardSecure** was looking to supplement its existing offering with a series of educational training courses aimed at charity trustees and company directors. **Digital Projects UK**’s track record in learning and development software enabled us to rapidly and efficiently deliver an impactful, high-quality training and certification platform for the client.

## WHAT THE CLIENT SAID

/// *I met Will through our mutual membership of the Institute of Chartered Accountants in England and Wales. Having seen the quality of the software he was producing and launching, it was with great confidence that I engaged Digital Projects UK to design and build our training portal. His highly objective approach to development and acute eye for detail have contributed a great deal to the evolution of our product as our market presence builds.*

Clive Bawden, Founder & CEO

## OUR VIEWPOINT

This project is a great example of our ability to deliver excellent software applications efficiently. The key to this is our Holy Trinity of critical success factors (see right). By diligently balancing these three aspects and leveraging our IP, we are able to create impactful outcomes for our clients that go beyond expectations.
